## PROFILE

I am an Economics graduate currently working as an ETL Developer and beginning a B.Sc. in Data Science this January. My experience involves managing the extraction process and transforming datasets into a structured format for analysis, bridging the gap between raw information and business insights. I have practical experience using Python for data tasks and am comfortable utilizing standard data visualization software. I value a logical approach to problem-solving and am eager to contribute to a team while continuing to grow my technical skillset.

## WORK EXPERIENCE

## ETL Developer

Auditec Solutions Inc.

March 2025 - Present

- Develop and maintain efficient ETL pipelines for extracting, transforming, and loading data from various sources
- Utilize Python and SQL to automate workflows and ensure data integrity across systems
- Extract data from PDF, Excel, and JSON files for integration into structured databases
- Collaborate with data analysts and engineers to support business intelligence and reporting needs
- Troubleshoot and resolve data issues, ensuring high-quality and reliable data delivery
- Document ETL processes and contribute to best practices for data integration

## Data Reporting Analyst (Intern)

TEB Bank

October - January 2025

- Assisted in the preparation and generation of daily, weekly, and monthly financial reports, ensuring accuracy and timely delivery.
- Analyzed large datasets to identify trends, patterns, and insights, supporting business decision-making.
- Developed and maintained automated reports and dashboards using Excel and reporting tools
- Worked closely with the finance and operations teams to gather data requirements and ensure report alignment with business goals.
- Performed data cleaning, validation, and transformation to ensure high-quality and consistent datasets.
- Assisted in the creation of ad-hoc reports for senior management, highlighting key performance indicators (KPIs) and operational metrics.
- Analyzed and evaluated competition reports and performance data from internal and external banking-related competitions to identify trends, insights, and best practices.

## File Reviewer

## On Call Prime

June - September 2024

- Evaluate property insurance claims to ensure they comply with company policies, procedures, and regulatory requirements.
- Examine the accuracy and completeness of supporting documents, including appraisals, repair estimates, photos, and adjuster reports.
- Confirm that the claims submitted fall within the coverage limits of the insured's policy and determine the extent of coverage.
- Assess the extent of property damage and compare it with the submitted repair estimates to ensure they align with industry standards.
- Collaborate with field adjusters and other stakeholders to gather additional information or clarify details regarding property damage and repairs.
